Introduction

The 1975 Community Survey on the structure of agricultural holdings is the third of a series which commenced in 1966/67 but is the first to include information for all Member States of the Community of Nine. The main results of the 1975 Survey are published in six volumes. These volumes consist of an introductory volume followed by five volumes of data. An outline of the contents of each volume is given at Appendix I.

In using the results given here it should be noted that, for some characteristics, the 1975 results differ significantly from those obtained from national sources. The problems of designing a multipurpose sample such as that used for the Farm Structure Survey make such discrepancies inevitable particularly for characteristics which are sparsely distributed, or for those which are highly concentrated in specialist holdings. Every endeavour has, of course, been made to maximize the precision of estimates from the Farm Structure Survey and it is believed that the results adequately show the pattern of farm structure. It is, however, probable that where estimates or distributions differ markedly from the corresponding national values for particular characteristics, the national results (which may be obtained from specially designed surveys) may give more precise estimates.

All absolute figures are rounded to the nearest hundred (except Luxembourg for which data are given to the nearest ten). Because roundings are carried out independently, totals may not correspond exactly to the sum of their components. Values of less than 50 (Luxembourg 5) are indicated by*. Values which have been suppressed in order to preserve statistical confidentiality are indicated by X. Blank spaces indicate items which do not exist or were not surveyed or where data are not available.

A summary of some methodological aspects follows. Full details are to be found in Volume I 'Introduction and methodological basis'.

Particular thanks are extended to the Statistical Services of Member States for their close cooperation in the conduct of this Survey.

Methodological Remarks

I. Sampling

The 1975 Community Survey has involved the collection of some 100 items of information by Member States for each of some 900 000 agricultural holdings surveyed and their transmission to the Statistical Office of the European Communities (SOEC).

The table below sets out figures which relate sample size to the total number of holdings in each Member State:

Country	No of holdings in field of survey ⁽¹⁾	Limits of sample size provided for in the Directive	No of holdings in survey	Column 3 as % of column 1

⁽¹⁾ Raised sample estimate except for Belgium and Netherlands.

⁽²⁾ Excludes 330 holdings for which for reasons of statistical confidentiality, no individual data but only summary results were delivered (see appendix II).

⁽³⁾ Full census results.

II. Survey unit

The survey unit was the agricultural holding as defined in Article 2 of Council Directive 75/108/EEC: a single unit, both technically and economically, which has a single management and the output of which is agricultural products.

The scope of the inquiry comprised:

- (a) agricultural holdings where the agricultural area utilized was one hectare or more;
- (b) agricultural holdings where the agricultural area utilized was less than one hectare, if they marketed a certain proportion of their production or if their standard gross production exceeded a certain number of physical units.

In two Member States, the United Kingdom and the Netherlands, certain agricultural holdings could exceed the limit of one hectare without being included provided they belonged to the category of holdings considered as statistically insignificant.

III. Date of survey

The survey covered one crop year corresponding to the crop harvested in 1975. Council Directive 75/108/EEC stipulated that the survey should be conducted in one or more stages between 1 March 1975 and 1 March 1976.

The surveys were conducted on the following dates:

FR OF GERMANY

IV. Reference periods

AGRICULTURAL AREA

The agricultural area utilized comprises the main crop areas used for the 1975 harvest, including areas sown in 1974 for harvest in 1975 and areas which are not yet producing crops. Areas cultivated in 1975 and normally intended for harvest in 1976 were excluded.

Livestock

The reference days for livestock were as follows:

FR OF GERMANY

3 December 1975.

FRANCE

1. As a rule, the days of the survey team's visit between 1 October 1975 and 28 February 1976, concentrating on the period around 1 December 1975 (especially as regards cattle).
2. The reference day for turkeys, turkey-cocks and geese, whose production has a markedly seasonal character, is 1 September 1975.

ITALY

16 November 1975.

NETHERLANDS

The day of the survey (between 1 April and 20 June 1975).

BELGIUM

15 May 1975.

LUXEMBOURG

15 May 1975.

UNITED KINGDOM

2 June 1975. Animals sent for sale on 2 June or the day before were included in the figures as if they were present on the holding on the reference day.

IRELAND

1 June 1975.

DENMARK

6 June 1975.

Tractors, Cultivators and Machinery

The day of the survey as regards machinery belonging to the holding and the 12 months preceding the day of the survey for machinery used by several holdings or belonging to a service supply agency.

Farm Labour Force

The 12 months preceding the day of the survey. The definitions stipulated that the period of observation could be shorter if the information supplied corresponded to 12 months. Six Member States recorded the data on the labour force relating to a 12-month period directly and three Member States extrapolated these data for this period on the basis of a shorter period of observation.

Two Member States recorded the labour present during a particular month: France for October 1975 and the Federal Republic of Germany for four weeks of April 1975.

Denmark considered the labour working on the day of the survey (3 October 1975). Information on the work input during an average week was collected, with the exception of labour not employed on a regular basis which was recorded for the previous 12 months.

Other Characteristics

The following characteristics refer to the day of the survey:

- the legal personality of the holding,
- the type of tenure of the agricultural area utilized (in relation to the holding)
- membership of agricultural cooperatives,
- manager's agricultural training,
- the specific non-agricultural education of the holder ⁽¹⁾.

The other characteristics refer to the 12 months preceding the day of the survey:

- production under contract of the products of the agricultural holding,
- accounts,
- draft animals,
- the holder's gainful activity other than agricultural work for the holding ⁽²⁾.

V. Standard units

1. Annual Work Unit (AWU)

● Use

For some statistical requirements, labour expressed as a number of persons is not a suitable reference number since it does not consider the annual working time actually worked on the holding, which may vary from slightly more than 0 % to 100 % in the case of a person employed full time. It cannot therefore be used as a suitable gauge in comparisons between the different holdings since it does not take into account the differing quantities of work of those employed full time and of those employed part time. Furthermore, non-family labour not regularly employed is not recorded by number of persons but by number of working days. The AWU was introduced into the schedule of tables in order to avoid these shortcomings and in order to have a standard unit taking account of the percentage of a person's working time actually worked on the holding.

⁽¹⁾ Optional question.

⁽²⁾ Recorded in the Federal Republic of Germany during four weeks of April 1975 and extrapolated over the calendar year.

● Definition

The annual work unit refers to the labour input of a person employed full time for agricultural work on the holding.

Full-time employment means a minimum of 2 200 hours per annum for the holder and his/her spouse.

For the rest of the labour force, full-time employment means the minimum hours required by the national provisions governing contracts of employment. If the number of hours is not specified in these contracts, then 2 200 hours is to be taken as the minimum figure.

This annual work unit, used by the SOEC, must not be confused with another national standard unit used in several Member States where, e.g. crop areas and livestock categories are given a coefficient based on the number of hours of work required for particular tasks the total of which gives the number of standard man-days per holding.

● Calculation

The information requested in the EEC list of characteristics about the holder, the members of his family and the non-family labour regularly employed relates to the time worked on the holding broken down by five categories as a percentage of annual time worked by full-time operatives; in the case of non-family labour not regularly employed the number of working days was recorded.

Persons working a minimum of 2 200 hours per annum were considered as working full time and as one unit.

The activity of part-time labour was converted proportionately into AWU: for four categories of part-time labour the average value for each category was adopted: 0.125 AWU (for persons having a work time of >0 — <25 % of the annual time worked by a person employed full time); 0.375 AWU (25 — <50 %); 0.625 AWU (50 — <75 %) and 0.875 AWU (75 — <100 %).

In any analysis of the data expressed in AWU, it should be noted that when the SOEC chose the representative value for conversion of work time into AWU it was not able to take account of national and regional variations in the distribution of labour within these classes of work time.

In the case of non-family labour not regularly employed in respect of which information was expressed in number of working days, the number of days was multiplied by 8 and divided by 2 200. One AWU is thus equivalent to 275 working days.

2. *Livestock Unit (LU)*

To ensure comparability of the survey results the coefficients were the same as those used for the 1966 — 1967 Community structures survey, except where changes in the livestock category breakdowns made it necessary to adjust certain coefficients.

Any interpretation of the data expressed in livestock units should take account of the Community nature of the coefficients used, which eliminates both national and regional variations in the distribution of animals by age or breed in the groups considered, and variations in the production and growth-rates.

The Community coefficients used for converting livestock information into livestock units, at the occasion of the 1975 structure survey, are as follows:

Equidae	0.6
Bovine animals under 1 year old	0.4
Bovine animals over 1 but under 2 years old, male	0.7
Bovine animals over 1 but under 2 years old, female	0.7
Bovine animals 2 years old and over:	
— male animals	1.0
— heifers	0.5
— dairy cows	1.0
— other cows	0.8
Sheep (all ages)	0.1
Goats (all ages)	0.1
Piglets of live weight of under 20 kg (per 100 head)	2.7
Breeding sows weighing 50 kg and over	0.5
Other pigs	0.3
Broilers (per 100 head)	0.7
Laying hens (per 100 head)	1.4
Other poultry (ducks, turkeys, geese and guinea fowl) (per 100 head)	3.0

(1) Items in the list of characteristics which were not surveyed — being either non-existent or negligible — are not included in this list.

(2) Values of 1 000 and more rounded to the nearest 100, values of less than 1 000 rounded to the nearest 10; 0 = data less than half the unit used; — = nil.

(3) Time worked expressed as a percentage of annual time worked by a full-time worker.

Germany (FR)

Raised and totalled results relating to 330 holdings in the sample for the Federal Republic were not delivered as individual data for reasons of statistical secrecy. These summary results at national level are given in appendix II; they are not included in the tabulations either for the Federal Republic or for the Community.

Ireland

Holdings operated by non-landholders (i.e. totally tenanted holdings) are excluded from the survey. 249 000 ha of utilized agricultural area (4,7 % of all utilized agricultural area on holdings) not covered by the survey is assumed to be largely accounted for by the acreage let to non-landholders.

Denmark

Figures for the utilisation of farm machinery are not available for Denmark. However, figures for machines in sole ownership are given under the headings relating to utilisation of machinery. These figures are also utilised in calculating the Community values under these heads.

In addition to the points noted above information on certain characteristics was not collected in some Member States. In most cases these characteristics are of no significance in the Member States concerned and the overall results are not affected by the lack of information. However, in a few cases the missing information is of some significance and has implications both for results for the individual Member State and for the Community total which refers to fewer than nine Member States for these characteristics. Detailed information on characteristics not covered is given in chapter VII of Volume I "Introduction and methodological basis" and particulars of some of the more significant cases are given below:

Accounts

Question D.01 on the keeping of farm accounts was not included in the national questionnaire for Ireland.

Membership of an agricultural cooperative

Question D.04.a 'Is the holding a member of a cooperative or other similar agricultural organization?' is subdivided into three parts: 'For the purposes of its supplies, of marketing its produce, of use of agricultural equipment and plant'.

The returns of the 1971 agricultural survey in Germany (FR) showed that subdividing this question would not have produced useful results. The German returns therefore give only a single general reply to this question.

Holder's gainful activities other than agricultural work on the holding

Ireland did not include the sections of this chapter (N.01, 02 and 03) in the national questionnaire. Germany (FR) did not include heading N.03 'Economic sector in which this gainful activity is carried on', in its national questionnaire.

Volume II.2 gives the main summarized results of the survey for each of 62 regions in Germany (FR), France, Italy and the United Kingdom. The codes used to identify these regions are given below.
